

Protect your assets

In an uncertain world, it is crucially important to protect assets from corrosion whilst out of service. This will reduce maintenance repair costs and enable assets to be returned to normal service much quicker if they are looked after now.

ROCOL® has an extensive range of high performance aerospace corrosion protection products ideal for protecting aircraft whilst out of service.

AEROSPEC® PROTECT SPRAY

Part Code: **300ml:16810**

Heavy-duty waxy film for long term corrosion protection of all types of components and equipment particularly those operating in outdoor and harsh environments.

- ▶ Offers an excellent wide temperature resistance of -40°C to +120°C
- ▶ Resistant to fuel, oils and greases
- ▶ Provides a tenacious, highly adhesive, long lasting film for complete corrosion protection even when partially or fully submerged in warm or hot water

Specifications

- ▶ Airbus approved
 - ▶ Airbus CML No. 12ACG6
- ▶ Ideal for
 - ▶ Landing gear axle sleeves
 - ▶ Hinges
 - ▶ Gearbox casings
 - ▶ Other exposed metal components

PX32

Part Code: **20L:16607**

A military grade corrosion preventative for the preservation and corrosion inhibition of structural members of airframes, interior surfaces of aircraft skins, components, bare metal and over certain paint systems. Cold applied, hard, transparent film for aircraft structures.

- ▶ Temperature range: -40°C to +110°C
- ▶ Excellent corrosion protection outdoors for up to 2 years
- ▶ Good de-watering properties and good penetration
- ▶ Resistant to removal by aircraft exterior cleaner
- ▶ Ideal for outdoor corrosion protection of exposed metal parts
- ▶ Resistant to anti-icing and de-icing fluids
- ▶ Does not contain silicones or chlorinated solvents

Specifications

- ▶ DEF STAN 80-83
- ▶ JSD: PX-32
- ▶ Nato stock no.: 8030 99 225-3835

Specifications

- ▶ DEF STAN 80-143/1
- ▶ JSD: PX-28
- ▶ Nato stock no.: 8030 99 657-7708

PX28

Part Code: **20L:16606**

A military grade corrosion preventative for the preservation and corrosion inhibition of the interior surfaces of hollow sections of automotive and vehicle underbodies, certain artillery components bare metal and over certain paint systems.

- ▶ Temperature range: -35°C to +110°C
- ▶ Heavy duty, waxy film for long term corrosion protection
- ▶ Excellent corrosion protection outdoors for up to 2 years
- ▶ Good de-watering properties good penetration
- ▶ Can provide a light lubricating film in some applications
- ▶ Does not contain silicones or chlorinated solvents

Z30 Fluid & Spray

Part Code: **300ml:37020 / 5L:37022 / 20L:37028**

A heavy-duty waxy film for corrosion protection of various machinery parts and pieces of equipment. It is particularly suitable for external conditions.

- ▶ Temperature range -20°C to +110°C
- ▶ Excellent corrosion protection outdoors for up to 2 years
- ▶ Good de-watering properties and good penetration
- ▶ Can provide a light lubricating film in some applications
- ▶ Does not contain silicones or chlorinated solvents
