

AeroShell Compound 07 de-icing fluid

- Strict quality control
- Trusted for decades

Shell Aviation

Pilots have trusted **AeroShell Compound 07** for decades to remove hoar frost, light snow and ice from their planes before take-off and in their in-flight de-icing systems.

The de-icing fluid is manufactured under strict quality control and can be used in CAV's TKS de-icing systems, fitted to some models of Beechcraft, Diamond, Cessna, Cirrus, Hawker, Kodiak, Mooney, Piper and other aircraft.

Applications

- In-flight de-icing of windscreens, propellers, wings, tailplanes and other items on suitably equipped aircraft
- Removing hoar frost, light snow and ice from parked aircraft

AeroShell Compound 07 can be sprayed undiluted or mixed with up to 50% water, depending on the severity of the icing conditions, the efficiency of the spraying technique and whether it is applied hot or cold.

All AeroShell products are compensated for lifecycle emissions

Specifications

- Approved DTD-406B (UK) (obsolete)
- NATO Code S-745
- Joint Service Designation AL-5 (UK)
